Manjimup Shire Planning Dept.

Dear Sir/Madam,

Please find the attached development application form to construct 4 additional aquaculture (marron)ponds on our property at 2100 Pemberton-Northcliffe Rd. Meerup.

The attached plan shows our existing 20 purpose built ponds and the location of the planned 4 additional ponds. These will be built alongside our existing two banks of 9 ponds. The ponds will be of earth construction and have an average depth of approximately 1.5 metres. They will have a 1.8m standpipe set in a concrete pad with underground piping joining the existing system for drain-down purposes and washing out.

Drain-down and wash-out water will be channelled into the existing settlement areas below the ponds.

P55932
