

Does your house contain asbestos?

Find out by using ACM Check (Asbestos-Containing Material Check), a free mobile phone app from Curtin University researchers.

Features of ACM Check

- Guides you through an inspection of your house
- Generates a summary report of your inspection
- Shows plenty of photos
- Provides links to other useful resources
- Quick, easy to use, and ad-free

What's Involved?

All you need to do is download ACM Check from the App Store (iOS) or Google Play Store (Android) and then complete the questionnaire!

Participate in Asbestos Research

If you agree, responses from any completed questionnaires can be anonymously shared with Curtin University researchers who will use the data in their research investigating the amount and condition of asbestos remaining in WA homes. You can choose to not share your data by clicking the toggle button to the “off” position on the very first screen. You will still have complete access to and use of ACM Check if you do not complete a questionnaire or if you choose to not share data.
