# COLLECTION MANAGEMENT WORKSHOP SERIES 2019

## WORKSHOP 3

*Friday - Sunday, May 31 - June 2*

### CONSERVATION OF FUNCTIONAL OBJECTS

*with David Hallam from R.M.Tait & Associates*

This workshop will see participants working together with David to discuss, assess and treat selected items from the former World of Energy collection.

Objects works through mechanical, electrical, hydraulic, or pneumatic means, but in each case their function is an integral part of the object, and a significant part of the information it provides. Participants will also learn about the decision making process for treating and preserving functional objects, and how to maintain functional objects on display and in storage.

David Hallam is a senior conservator and Director at R.M Tait and Associates. He has a degree in Applied Chemistry and Materials Conservation.

## WORKSHOP 4

*Saturday, June 29*

### FOLLOW UP CONSERVATION WORKSHOP

*with Vanessa Wiggin*

This session allows participants from one or all of the previous three workshops held in the series to work under the supervision of conservator Vanessa Wiggin.

The workshop will focus on ensuring that conservation standards are being followed, and volunteers have an opportunity to discuss any difficult issues encountered during their own conservation practice.

Vanessa is the Director of Museumly. She holds a Bachelor of Applied Science in Conservation of Cultural Materials, Bachelor of Cultural Studies in Marine Archaeological Conservation and Masters of Cultural Heritage.
